

Question 4:

Users are required to enter an integer number to define “rows” of the half Pyramid pattern (row > 0).

Program prints out the half Pyramid of number.

Below is an example of how the program will run.

For example, enter 6 for “row”:

```
6
OUTPUT:
1
1 2
1 2 3
1 2 3 4
1 2 3 4 5
1 2 3 4 5 6
Press any key to continue . . .
```
